Dance Friday Night

Mrs. Trainor's Radio Orchestra at East Community Hall, Friday, Nov. 18

The committee in charge of the East Community Hall have been successful in securing the services of the Trainor-Robertson orchestra for their dance on Friday night of this week. This well known Calgary orchestra needs no introduction in this part of the country.

How Our Money System Works

R. B. Calls It "Sound" Money

A cheque for \$1.00 was issued in payment of an account. The cheque was endorsed and used to make another purchase. After this cheque had been used 20 times as above it was presented to the Bank and called to be N. S. F. The banker found in the 20 men who had endorsed the cheque and asked each man to pay 5 cents and make the cheque good. As 15 per cent. had been made on each sale by these men they paid the 5 cents and were still 10 cents ahead.

Who wins and who loses?

Municipal District of Rosebud

Regular meeting of the Council was held in the municipal office at Crossfield on Saturday 12th inst. All members present.

It was agreed to grant the sum of \$25.00 to the Canadian Red Cross Society in response to their appeal for assistance.

Mr. E. M. Crisfield was appointed to act as collector and bailiff for the district in cases where it may be necessary to take action to collect.

Court of Revision in connection with the assessment will be held at Crossfield on Friday 9th Dec. at 2 p.m.

Arrangements were made for the annual meeting to be held on third Saturday in February 1933 and the following officers were appointed:

Returning Officers, Mr. F. Purvis

Deputy Returning Officers:

Division 1--Mr. W. Knight

Division 3--Mr. R. T. Amery

Division 6--Mr. D. Yellowlees

Reports of the meeting held in Crossfield to discuss the question of larger Municipalities were given by the Deputy Reeve and others, and the matter discussed in full.

The Reeve and Councillor Davis are the official delegates to the Convention of the Association of Municipal Districts. All members however expressed their intention to be present.

IT MIGHT BE WORSE, BUT?

Frank Purvis says one of his relatives dug up their family tree and discovered they were of Scotch parentage instead of Irish.

"Happy" says Frank should shoot that relative, as it is tough enough on a man of Frank's age to be of Scotch parentage without having to admit it.

Girls are like the old North West Mounties "they get their man," but the modern way is to ear mark them. The first ear mark registered locally is "five teeth marks in the left ear."

Board of Trade Luncheon

The Right Rev. L. Ralph Sherman, D. D. Bishop of Calgary, will be the speaker at the Board of Trade luncheon to be held in the U. F. A. Hall at 6.30 this evening (Thursday).

Annual Bazaar November 26th.

The Womens Guild are holding their annual bazaar on November 26th in the U. F. A. Hall. Will also serve tea and sell home cooking.

They have some very nice fancy work and it would be worth your while to have a few Xmas gifts ready, so come along and see what they have at reasonable prices.

What brand of cigarettes does Bennett smoke?

CROSSFIELD PAYS TRIBUTE TO MEN WHO FELL IN WAR

The United Church was filled with people who had evidently come in a worshipful mood, the centre seats being occupied by over two dozen retired men. Appropriate hymns and prayers were used.

A joint choir of the Anglican and United Churches, with Mrs. R. T. Amery at the organ, led the singing. Rev. A. C. Currie led in the prayers and Rev. H. Young presided and gave the address. He spoke on the fellowship of suffering, saying that the comradeship of the trenches was sealed by the blood of 50,000 Canadians who had given their lives and also by the intense suffering of over 200,000 crippled or deformed perhaps for life. He pleaded for a comradeship that would embrace not only our own nation but the whole world.

The names of those from this district who had given their lives were read by Mr. Allen Montgomery, and a beautiful wreath placed on the honor roll, after which Mrs. J. Crocker sang beautifully "In Flanders Field."

After the address, Mr. T. Goldie sang with fine expression and effect "The Reckoning."

After the church service the members of the Canadian Legion and other friends repaired to the cemetery where Flanders poppies were laid on the graves of departed comrades and a prayer of grateful thankfulness for those who counted not their lives dear so long as they were able to help overthrow might. We who know all this have a common duty to see that those who come after know the meaning of "Lest We Forget."

W. Major who designed and made the beautiful plaque for the Roll of Honor, is to be highly commended for the excellence of his workmanship.

ARMISTICE DANCE A GRAND SUCCESS

The Remembrance Day Dance under the auspices of the local branch of the Canadian Legion was once again a great success. A record crowd were out to enjoy themselves and help to celebrate the memorable eleventh day of the eleventh month which ended the Great War.

The winning ticket, No. 177, was held by Mr. W. Landymore who was right, there to receive his ten dollar bill.

A bounteous lunch was served, provided by the ladies of the district, everyone doing their best to do it justice.

The orchestra played splendid music and the singing was enjoyed, everybody joining in the choruses and seeming to like it.

The committee in charge wish to thank everyone who helped make the evening such a success, especially the ladies who so kindly donated the bulk of the supper.

Crossfield Chautauqua

In another column of the Chronicle may be seen the advertisement of the Canadian Chautauqua which comes to Crossfield November 29-30, Dec. 1-2, with a particularly splendid series of programmes.

The season tickets for the full series of six shows are very reasonable and should be an inducement for the public to take in all the performances.

The teachers of the United Church Sunday School are busy preparing for the annual Christmas Entertainment.

BORN--To Mr. and Mrs. Neil Murphy (nee Christina Robertson) at the Holy Cross Hospital Calgary, on Nov. 17, a daughter, Margaret Mary.

The annual Oneil School Christmas Concert will be held in the school house on Dec. 23rd.

Strength And Courage.

Can we do better this week, following so soon after the observance of Remembrance Day, than reproduce in this column an editorial from the National Home Weekly, published in Winnipeg? We think not. So here it is:

Gradually it is becoming clear to the minds of most people that conditions today are far more serious than they were during the years of the War. For then, men were buoyed up by hope. They knew that in time their troubles would be over. But no one can tell when this present misfortune will end. The mist of yesterday has become the dense black cloud of today. With many, despair has supplanted the strength of courage.

It will not be out of place, then, to recall the words and deeds that during the War inspired hope and urged steadfastness. Of all the written measures there was perhaps nothing finer than the address of General Currie to the Canadian army on the eve of the great advance in March, 1918. In it he makes clear the seriousness of the struggle and the danger of defeat; he indicates the successes already won, and states the need of the moment.

Finally he speaks of the reward of victory. The message will be read again with vivid recollections by those who were in the ranks in 1918. May all who read it now for the first time feel that it is equally appropriate today. The problems to be solved, the forces to be overcome, are just as real and as great, and the virtues of constancy, courage and self-sacrifice are just as necessary.

SPECIAL ORDER, March 27th, 1918:—"In an endeavour to reach an immediate decision the enemy has gathered all his forces and struck a mighty blow at the British Army. Overwhelmed by sheer weight of numbers the British Divisions have fallen. Scarpe and Oise have fallen back fighting hard, steady and undismayed."

"Measures have been taken successfully to meet this German onslaught. The French have gathered a powerful army, commanded by a brave and trusted leader, and this army is now moving to our help. Fresh British Divisions are now being thrown in. The Canadians are soon to be engaged. Our Motor Machine-Gun Brigade has already played a most gallant part and once again covered itself with glory."

"Looking back with pride on the unbroken record of your glorious achievements, asking you to realize that today the fate of the British Empire hangs in the balance, I place my trust in the Canadian Corps, knowing that where Canadians are engaged there can be no giving way."

"Under the orders of your devoted officers in the coming battle you will advance or fall where you stand facing the enemy."

"To those who will fall I say, 'You will not die but step into immortality. Your mothers will not lament your fate but will be proud to have borne such sons. Your names will be revered forever and ever by your grateful country, and God will take you into Himself.'"

"Canadians, in this fateful hour, I command you and I trust you to fight as you have ever fought with all your strength, with all your determination, with all your tranquil courage. On many a hard-fought field of battle you have overcome this enemy. With God's help you shall achieve victory once more."

The seriousness of conditions today may be observed in both national and international affairs. At home trade is languishing, the army of the unemployed is increasing, and what of all young people still entering manhood and womanhood are being deprived of the opportunity to earn a living or to form life associations or to contribute to good citizenship. The result is a growing feeling of discontent. Each individual is inclined to blame all others for prevailing misfortunes.

Internationally the problem is even more acute. Debtor countries are refusing to pay, because they feel that they have been unjustly treated, or because they no longer have world-collars to meet the demand. Nor will tariff barriers permit payment in the form of goods. To accentuate the mischief nation is vying with nation in the production of armaments. As for over-crowded states there is no territory available for the surplus population. All of these things make for the spread of those national hatreds which are one of the causes of war. If quarrelling is easily possible when people are prosperous and inclined to be friendly, it is almost certain to result in violent form when they lose confidence in each other, and when extreme distress prevails.

The only way to avert disaster is the way of usefulness and self-sacrifice. It is true today as of old that regardless of race, color or creed man is his brother's keeper. It is true now as two thousands years ago that men shall find their lives in losing theirs. The victories of peace are as glorious and as costly as the victories of war.

Driven by the higher motive it is easy for men to transform a world. The channels of trade will be thrown open, waste areas will be populated, armaments will be cast away, production and consumption will find a balance. Within the state, opportunities for culture and comfort will be measurably equal for all. The markets of the world will be of more value than the machine's production, the needs of the many shall be of more account than the desires of the few, the rich shall not batten on the poor, the laws of the land shall not favor the designs of the privileged class. But each man, recognizing that his neighbor has rights equal to his own, shall honor justice and practise righteousness. Thus in peace may they catch the spirit of General Currie's message. In 1918 men may be as brave, as loyal and as nobly self-sacrificing as they were in 1918. May they hear again the words, "Canadians, in this fateful hour, I command you, I trust you to fight as you have ever fought with all your strength, with all your determination, with all your tranquil courage."

With God's help you shall achieve victory once more."

Season To Open Early

Steamship Sailings From Britain To Churchill To Start In July
Steamship sailings from the United Kingdom and Antwerp for Churchill will start in July, 1933, according to word received by D. A. Ross, secretary of the board of trade, from Thomas Harling and Sons, steamship agents, Montreal. The first ship will load general cargo in England and European ports for the prairie provinces. The communication states that the rates will be the same from England and Belgium to Churchill, as from overseas ports to Montreal, thus giving prairie buyers a distinct advantage in lesser rail haul.

Green apples can be made rosy red in 48 hours by treating them with an ultra-violet light, but the process is at present very costly.

Puerto Rico, Hawaii and Alaska are buying more automobile cabs this year than last.

Had Spectacular Career

Britain Mourns Captain Hunter
"Father Of The Navy"
Britons mourn the death of Capt. James Edward Hunter, 83, "Father" of the Navy. Captain Hunter entered the Royal Navy as a cadet in 1848 and began a spectacular career. He first figured in dispatches when, as a young officer, he led six volunteers in a boat in a gale off Sebastopol in the Crimean War and saved 47 men marooned on wrecks, braving heavy Connaught fire. After retiring from active service Captain Hunter became engineer-in-chief of the navy.

Just His Bad Luck

Customer: "You said the tortoise I bought from you would live three hundred years, and it died the day after I bought it."

Dealer: "Now, isn't that too bad? The 300 years must have been up."

In a recent month 3,000 radio licenses were issued in England.

Her Heart Was Weak

Nerves Shaky, Nights Restless

Mrs. A. Black, Wallaceburg, Ont., writes: "I suffered from heart weakness, shaky nerves, and restless nights."

I saw your advertisement for Milburn's Heart and Nerve Pills and decided to try them although I did not have much faith, but now I am very thankful I did as they have proved of wonderful help to me.

I am now strong and well again, but am now without a box in the house."

For sale at all drug and general stores; get up only by The T. Milburn Co., Ltd., Toronto, Ont.

Old Country People Drinking Goat's Milk

More Easily Digested and Free From Tuberculosis Germs

The people of the United Kingdom are drinking more goat's milk. Twenty years ago the production was 2,000,000 gallons a year. Six years ago it had increased to 12,000,000 gallons. Today it has reached the high figure of 20,000,000 gallons (declares the Sunday Express). And these are the reasons:

Goat's milk is more easily digested than cow's milk; it is richer in butterfat; it is free from tuberculosis germs; and women have found that it will make their skins more beautiful. They have learned that a "peach-bloom" complexion can be acquired simply by bathing the face, neck, and arms two or three times a day with goat's milk.

STAIRS MADE HER GASP FOR BREATH

Penalty Of Excess Fat

Although she has lost but 7 lbs. of her overweight, this woman finds that her 145 lbs. has made a remarkable difference to her. There can certainly be nothing wrong with a reducing treatment that brings such increased energy and vigor.

Her letter reads:—"I am 53 years old and my height is 5 ft. Last year I weighed 155 lbs. For months I have been taking a half-teaspoonful of Kruschen Salts, making no change in my diet. Now I am less round the hips, and only weigh 147 lbs. dressed. But I feel lighter and can now run upstairs without which used to make me gasp for breath. Everyone says how well and fit I look, as I am in a store and get no walking exercise at all. The results may not be startling, but the fact remains that I feel much better than of late years—not so heavy—and I now enjoy dancing."

Kruschen is based on scientific principle—it is an ideal blend of separate minerals which help glands, nerves, blood and body organs to function properly and maintain a splendid degree of health—it builds up energy and strength all the while you're training yourself down to a point of normal weight.

Means Revenue For Paris

Electrically Lighted Ad On Eiffel Tower Gains Fourteen Times

The Citroen electrically lighted ad. on Eiffel Tower split Paris into factions. The friable artist considered it sacrilege, the stolidly practical considered it added revenue for the city. It changed it. The night sky rose bush, flashes of lightning, a constellation of stars, a sky high fountain rising and falling, etc. Only once does it burst into a full length spelling out of C-I-T-R-O-E-N.

OFF COLOUR? HOW IS YOUR LIVER?

Wake up your Liver Bile

—Without Calomel

Your liver is a very small organ, but it certainly has got your digestive and eliminative organs out of its power. It is your liver that is the cause of your skin troubles. You won't completely correct such a condition by taking a mineral water, healthy food or chewing gum or roughage. When you've moved your bowels they're through—and you need a liver stimulant.

Carter's Little Liver Bile will soon bring back the sunshine into your life. They're purely vegetable. Safe. Sure. Ask for them by name. Get the substitutes. 25c at all drug stores.

Stolen Auto "Shouts"

A stolen automobile will "shout" for help if equipped with the "Bing-bong" alarm, which has been perfected by a Chinese inventor in Shanghai. It is a small electrical box which can be placed anywhere in the car. A switch is turned on when the auto is parked. When the car is touched the box lets out a shriek, and will continue to do so indefinitely.

Cause Of Asthma. No one can say with certainty exactly what causes the establishing of asthmatic conditions. Dust from the street, from flowers, from grain and various other irritants may set up a trouble impossible to irritate except through a sure preparation such as Dr. J. D. Kellogg's Asthma Remedy. Uncertainty may exist as to cause, but there can be no uncertainty regarding remedy which has freed a generation of asthmatic victims from this scourge of the bronchial tubes. It is sold everywhere.

Takes Position As Waiter

A Cornish baronet, who is eighth holder of the title is going to Tangier as a hotel waiter, and has pledged himself to remain for six months. He is Sir William Law Williams, aged 26. He was educated at Eton and has been an officer in the Royal Welsh Fusiliers.

Vacuum cleaners are being rented in Belgium for 28 cents a day.

Twenty-seven United States submarines are out of commission.

Landlords Would Be Protected

Quebec May Grant Them Priority

Over Lien On Installment Goods

A bill that would give to landlords priority of lien on goods bought by installment, instead of the merchants who sell them, will be presented at the next session of the Quebec legislature, it is announced by Rosario Gaudry, secretary of the Proprietary Owners' League of Montreal. Such a measure, Mr. Gaudry explained, would provide landlords with further protection against tenants who went beyond their means in the purchase of long-period-to-pay goods.

Latest Flying Invention

Newest 'Plane Can Be Controlled By One Finger

An aeroplane which can be flown, manoeuvred, and landed with only one finger is the latest flying invention. The machine is of the autogyro "windmill" type and is being built under license near Glasgow.

There is only one control for all movements of the machine. Apart from the operation of opening and closing the throttle, the whole control of the craft literally can be done with one finger.

Persian Balm—there is nothing like it

for creating and preserving a lovely complexion. Cooling, cleansing, it soothes and dispels all roughness or chafe caused by weather conditions. Delicately fragrant, it adds exquisite charm to the most finished appearance. Dainty women inevitably choose Persian Balm. A velvety smooth lotion, it makes the skin rose-lip in texture. Recommended also to soften and whiten the hands. Try a perfect toilet requisite for every woman.

Obnoxious Billboards

Often Disturb Driver's Attention

From Important Traffic Directions

There are two counts against the billboard on the highway. It not only mars the landscape and destroys the natural beauty of roadside scenery, but its garishness also distracts the attention of the driver of the car. Important traffic directions posted along the road are a part of our penal system. But who can defend a system which for similar offences fines the wealthy and imprisons the poor? A scientific system of fines which had some relation to the capacity of the individual to pay would probably result in a considerable reduction of the number of criminals for non-payment.—New Statesman and Nation.

Equality Of Punishment

System Now In Use Could Be Vastly Improved

A fine is a most effective way of registering social disapproval and for this reason will probably continue for a long time as a part of our penal system. But who can defend a system which for similar offences fines the wealthy and imprisons the poor? A scientific system of fines which had some relation to the capacity of the individual to pay would probably result in a considerable reduction of the number of criminals for non-payment.—New Statesman and Nation.

English, German and French

English is spoken by 160,000,000 and is understood by 60,000,000 or more who do not look upon it as their native tongue. German is spoken by 60,000,000 and is understood and used by 20,000,000 more. French is spoken by 45,000,000 and understood and used by 75,000,000 more.

An Oil That Is Famous—Though

Canada was not the birthplace of Dr. Thomas' Electric Oil, it is the home of that famous compound. From here its good name was spread to Central and South America, the West Indies, Australia and New Zealand. That is far ahead enough to attest its excellence, for in all these countries it is on sale and in demand.

Wholesale commodity prices in Canada are 50 per cent. higher than a year ago.

Recipes For This Week

(By Betty Barclay)

CHERRY ROLLS

- 1½ cups special cake flour, sifted.
- 3 teaspoons baking powder.
- ½ teaspoon salt.
- 2 tablespoons butter or other shortening.
- ½ cup milk (about).
- 1 can (2 cups) red cherries, seeded and drained.

Sift flour once, measure, add baking powder and salt, and sift again. Cut in shortening. Add milk gradually until soft dough is formed. Roll ¼ inch thick. Cover with cherries. Roll in long roll, pressing edges together. Cut into 1½ inch slices. Place in greased pan and pour cherry sauce over them. Bake in hot oven (425 degrees Fahrenheit) 30 minutes, basting often. Serve hot, with sauce poured around them and a tablespoon of whipped cream placed on each slice. Serves 6.

SAVORY MEAT LOAF

- 2 thin 3-inch slices salt pork, diced.
- 2 pounds round beef, ground.
- ½ cup quick-cooking tapioca.
- ½ small onion, finely chopped.
- 2 cups canned tomatoes.
- 2½ teaspoons salt.
- ¼ teaspoon pepper.

Try out salt pork until golden brown. Add pork and drippings to other ingredients and mix thoroughly. Bake in loaf pan, 7 x 5 x 3 inches, in hot oven (450 degrees Fahrenheit) 15 minutes; then decrease heat to moderate (350 degrees Fahrenheit) and bake 30 minutes longer. Serve hot or cold. Garnish with parsley. Serves 10.

Miller's Worm Powders work so effectively

that no traces of worms can be found. The pests pass away in the stools without being perceptible. They make an entire and clean sweep of the intestines, and nothing in the shape of a worm can find lodgment there when these powders are in operation. Nothing could be more thorough or desirable than their action.

One Thing They Know

"People who live in these apartment buildings don't know anything about each other, I hear," said the man from the country. "No," replied the flat dweller, "but you can't have cabbage for dinner without everybody else in the building finding it out."

Britain's longest-lived people have

been found in the rural districts near Newcastle, where many people still lead quiet primitive lives.

More used cars are being sold in

France than in many years.

CHILDRENS COLDS

CHECKED 2 weeks without "dozing"

OVER 26 MILLION JARS USED YEARLY

Interesting Broadcasts

National Council Of Education

Sponsoring Programme Of Educational Value

The "N.E.C." programmes over C.K.Y. for the five weeks dating from October 30 will be something new in broadcasting. Programmes will be given every day except Saturday and the series will deal with conditions as they were in 1800. Sunday programmes will feature music of 1800 including the masters, Beethoven, Mozart, and Haydn, and will be directed by Miss Eva Clare. Mondays will be devoted to outstanding men, Napoleon, Wellington, Pitt, Stein, and Washington. Industry and Commerce will be the theme for Tuesday, and Literature will be featured on Wednesday, dealing with Goethe, Scott, Byron, Wordsworth and Chaucer. Thursday, the schools, farms, doctors, preachers, and dialects of 1800 will be dealt with on Thursdays, and Fridays are set aside for the science and inventions of that period. Prominent Winnipeg speakers will deliver the addresses. The weekday programmes will commence at 8 p.m.

These broadcasts are sponsored by the National Council of Education under the chairmanship of Mr. Edward Anderson, K.C., with Mrs. R. F. McWilliams, chairman of the Radio Committee, in charge.

As a vermicide an excellent preparation

is Mother Graves' Worm Exterminator. It has saved the lives of countless children.

The largest valley in the Great Rift of Africa, which begins in the north of Palestine and stretches south for a distance of 5,000 miles.

John C. Calhoun, vice-president under John Quincy Adams, was the only one ever to resign from that office.

ACID STOMACH

Before each meal a teaspoonful of Phillips' Milk of Magnesia to sweeten stomach

● If rich foods disagree, it need not mean a "weak stomach." Sourness and gas doesn't mean "indigestion." Just take an anti-acid to sweeten the system, and enjoy life! Before meals, or afterward when distress is felt. Do this awhile, and stomach and bowels will be in fine order. Use only genuine Phillips' Milk of Magnesia; it is standard. The other preparations do not have the same anti-acid action.

ALSO IN TABLET FORM, Phillips' Milk of Magnesia Tablets are now on sale at drug stores everywhere. Each tiny tablet is the equivalent of a teaspoonful of genuine Phillips' Milk of Magnesia.

Made in Canada

Agreement Reached At Ottawa Conference May Have Beneficial Effect On Hog Industry In Canada

Since the Ottawa Economic Conference events appear to be steadily moving forward towards making effective the agreements reached there, Principal among the agreements are those affecting livestock and animal products.

The principle adopted by the United Kingdom for the control of her markets for meats is "limitation of imports." This system of limitation of imports is being applied to all the important classes of meats—beef, lamb and mutton, bacon and hams, and certain classes of by-products.

In Canada, more has been said about the agreement as it affects bacon. However, it would appear that the determination by Britain to limit the importations of all meats, is the really big fact to grasp. It is this fact that gives the assignment by the United Kingdom to Canada of 280,000,000 pounds of bacon a meaning and significance.

From the standpoint of the Canadian livestock industry it is important, then, that the agreements, as they apply to all classes of meats, should be known. It would appear that the United Kingdom adopted, at the Conference, the principle of stating to each Dominion what she undertook to do with reference to the meat and meat products in which each Dominion was mostly interested. This, however, does not limit the effect on any particular meat to the Dominion to which the United Kingdom declared her policy. The agreements should be viewed as a whole in order to understand the policy adopted by the United Kingdom.

The agreements apply to certain classes of meats, but for some time Britain has had restriction of imports of other classes of meats. These restrictions are mostly based on protection of the health of British livestock. In practice the restrictions confine imports of live cattle and other meat animals to those from Ireland and Canada. Imports of fresh meats from Europe are embargoed, which practically limits this import trade to the Irish Free State. These restrictions, then, already limit imports of fresh meats and live animals. Other meats enter Britain as chilled, frozen, or cured. The policy declared by the United Kingdom at Ottawa will limit the importations of these latter classes of meats.

The policy declared by the United Kingdom with regard to livestock and animal products may be summarized thus:

Live Cattle—removal of restrictions on imports of Canadian commercial cattle and, in part, on the stock that may be used for breeding.

Chilled and Frozen Beef—regulation of imports from foreign countries on the basis of an agreement reached with Australia.

Frozen Mutton and Lamb—regulation of imports from foreign countries (and from Australia and New Zealand for a period) on the basis of an agreement reached with Australia and New Zealand.

Bacon and Hams—declaration to undertake the regulation of importation of bacon and hams and, on the basis of an agreement reached with Canada, to guarantee free entry for up to 2,600,000 cwts. per annum of Canadian bacon and hams of good quality (250,000,000 lbs.).

The adoption, by the United Kingdom, of what would appear to be a most momentous policy, was the result of a series of events and conditions. European importing countries and America had steadily been raising barriers of various kinds against the importation of animal products. Great Britain remained the only open market. Therefore, all those countries that had formerly been exporting a part, or the bulk of their products to Britain, and all the exporting countries which had not formerly sent product there in quantity, were forced to concentrate more and more of their surpluses on that market.

In addition, production particularly of bacon and mutton heavily increased. The collapse of grain prices which gave European bacon producers very cheap feed for hogs in 1930 and 1931 induced large increase in production, not only in the countries that had formerly been supplying the bulk of British imports, but also in the countries that lately had been forced to send their bacon to Britain. Furthermore, the new countries to enter the British market, such as Poland, Estonia, Lithuania, Latvia and Holland, in order to develop the proper kind of hog and establish themselves on the British market adopted various schemes of bounties and subsidies.

Britain's declared policy gives an

aspect to the future which deserves the closest study and consideration. Present prices for bacon and hogs are so low as to be extremely discouraging. If the future is to be judged only by present price conditions, there is no prospect; the hog industry in all countries will die. But it is these conditions which led the United Kingdom to determine on the policy which was declared at Ottawa. Apart altogether from that declared policy, present price conditions, viewed in their proper light, are certain indications of better prices in the future.

Under extreme conditions, such as at present, the industries best suited to certain countries always survive. Canada is one of the countries that has the natural conditions for the survival of the hog industry. The policy declared by the Government of the United Kingdom is intended to favor the survival of the hog industry of Canada.

(By Ruth Rogers)

PARIS IS COLLAR CONSCIOUS
YOU MUST HAVE ONE FOR
YOUR LAST YEAR'S DRESS

It will bring it right up to the minute. Here you have four darling ones to choose from—or you can make all four. The pattern includes these four smart designs.

View No. 1 is the small nun's collar which can be made of a very small piece of material. It is especially nice in fine wale pique or rough crepe silk in white.

It will be rather difficult to make a decision in the three cape models. One is equally as smart as the other.

View Nos. 3 and 4 will completely transform a last year's dress with a new neckline, making it appear like a new Paris model.

View No. 2—is a very youthful and flattering model. While crepe satin, white rough crepe silk or colors and fabrics to tone with your dress are appropriate.

Style No. 953 comes in one size for misses and ladies.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

New National Park Planned

Two Sites On Vancouver Island Are Being Considered

Establishment of a new national park in British Columbia is being considered by the Canadian and provincial governments, and F. M. Wardle, chief engineer of the federal parks branch, has been on the coast recently laying the groundwork for such a project.

Garibaldi Mountain is favorably regarded as a site for the new park, although the parks branch is said to be eager to establish a sea level park to complete its trans-Canada parks system. For the latter purpose a park site on the west coast of Vancouver Island is being considered. The only other national park on Vancouver Island is Strathcona, which, however, is mountainous and somewhat inaccessible.

Colonel W. W. Foster, member of the Mount Logan expedition, of several years ago and one of the best known mountaineers in Canada, has completed a report on the Garibaldi project and this has been sent to Ottawa.

Tramped Historic Highway

Forty-six students from Germany who recently hiked through the west highlands of Scotland, tramped along the highway between Glencoe and Kinlochleven, which was constructed during the World War by relatives who were then prisoners of war.

Distinctive Canadian Formula Is Now Used For Extraction Of Radium From Western Ores

How Cancer Begins

Everyone Should Know the Symptoms and Receive Early Treatment

Cancer never begins as cancer, Dr. Joseph C. Bloodgood, cancer research worker of Johns Hopkins University, Baltimore, told the Ottawa Medical Chirurgical Society.

"It begins as a single spot," he said, "and the normal cells of that spot are changed to abnormal cells, which are not cancer cells."

Chronic irritation, injury or pre-existing lumps such as warts or moles and unhealed wounds anywhere are the site in which cancer develops, the doctor continued.

He stressed it was important that everyone should know the symptoms, signs of little things that are not cancer but which may become cancer and the earliest stages of cancer are identical.

"On this fundamental advice rests the action of having an immediate examination after the first warning," he declared.

Dr. Bloodgood told his audience women suffering from early detected cancer of the breast run no more than a 25 per cent risk that attempts to cure them will fail, while those who defer examination through ignorance reduce their chances of cure to 10 per cent or less.

A semi-annual examination of mothers, he said, would permit detection of spots in the cervix which are not cancer but which may become cancer or are the earliest stages of cancer. Radium treatment could then be used to cure a large percentage of the cases.

Under present conditions, he declared, most mothers seeking examination for cancer of the cervix had the disease in such an advanced stage that there was no more than a 10 per cent chance of cure.

A Prosperous Town

Full-Time Job For Every Man In Corbin, B.C.

Which is the most prosperous town in Canada?

According to Thomas Uphill, Labor member for Fernie, B.C., the nomination should go to Corbin, B.C. Every man in the town has a full-time job. Corbin is a coal mine town, and although the mine employs only 300, there are more than 100 automobiles there. The town incidentally is the only place in British Columbia where not a dollar of unemployment relief money has so far been spent.

But just a few miles away, at Fernie, B.C., is one of the poorest towns, from the economic standpoint, according to Uphill. The city is unable to meet its one-third share of unemployment relief; already it is far in arrears.

Mr. Uphill created a sensation at the last session of the legislature by proposing that the government should raise money by selling titles. Wealthy men would be eager to pay a stated sum for a provincial knighthood, he said.

U.S. Farm Population

Many Return To The Land As a Result of Hard Times

Hard times have resulted in a trek "back to the land" in the United States, statistics issued by the Department of Agriculture reveal. Present farm population of the country is estimated at 32,000,000, an increase of about 2,000,000 in three years.

Farm population in the United States reached a peak in 1910, the department says, when it was 32,077,000. Thereafter it steadily declined for twenty years as country families moved into the towns to share the profits of the long industrial boom. United States citizens living on the land numbered 31,570,000 in 1920 and 30,069,000 at the start of 1930. The three-year depression has driven nearly two million people back to rural life, so that farm population now approaches its 1910 high point.

Only One Answer

He—You're so good at conundrums—try this.

She—Sure, go ahead.

He—Take away my first letter, take away my second letter, take away all my letters, and I am still the same. What am I?

She—That's easy you're a mail carrier.

To ward off a hail storm, peasants of southern Europe used to ring bells or blow horns.

A distinctive Canadian formula for the extraction of radium from the pitchblende ore found at Great Bear Lake, Northwest Territories, has been developed by scientists of the Canadian Government Department of Mines, according to a statement just issued by Hon. Wesley A. Gordon, Minister of Mines. The new formula is the result of more than a year's intensive research work by chemists of the Department of Mines.

The Canadian process, according to Mr. Gordon, will permit as great, if not greater, percentage of recovery, involving a shorter time and less complicated operations than any of the known methods. Canada will, it is expected, now be able to supply not only her own radium needs for therapeutic, scientific and commercial purposes, but will be able to enter world markets.

Partly on account of the high-grade character of the Canadian ores and partly because of the shorter time and simplified method of the new process, it is believed that the costs of reduction will be considerably less than under other methods of extraction. Hydrochloric acid is used as a solvent in the new method instead of the usual sulphuric acid and a large number of stages formerly considered necessary have been eliminated. Instead of about forty operations, supposed to be used in other countries, radium salts have been produced in the laboratory of the Canadian Government Department of Mines with less than half that number of steps. The chief cost in radium reduction lies in cost of chemicals, about three tons being required for the production of every ton of ore. The new process has been adapted to treat with almost equal success both siliceous ore and the silver carbonate ore with which pitchblende is found associated in the Great Bear Lake field.

About 4,000 grams of radium-bearing concentrates have been extracted in the experimental work. The yield worked out at one gram of radium from ten tons of pitchblende from the Great Bear Lake ore. A radium refinery is to be established at Fort Hope, Ontario, where the ore will be taken for the extraction of radium and by-products, such as uranium, lead and silver.

Forester Explains

Coloring Of Leaves

Contrary To Popular Belief Frost Is Not Cause

Jack Frost's only paint is white, John Keller of the Pennsylvania State Department of Forests said in explaining that time, not frost, gives forest leaves their autumn colors.

"The ripening of leaves is the cause of the change in color of the forest foliage and not the action of the frost," said Keller in disputing a popular belief.

"Frost may hasten the processes of turning leaves brown. A heavy frosting in late September or early October robs rather than adds the leaves of their chances for brilliant coloration."

A long dry autumn with not too heavy frosts brings the finest succession of colors, while chemical changes in the mineral substances within the minute leaf cells produce the wonderful shades of red and yellow, according to Keller.

Leaves fall from trees because they are "worn out" and have been drained of all the pulp that was stored in the twig, the forestry expert said.

The Sounding Creek Map Sheet

Sounding Creek is an intermittent stream rising about twenty miles north of Youngstown, Alberta, which after flowing in a southerly and easterly direction turns north again and empties into Sounding Lake. The outlet of Sounding Lake is Evelyn Creek which flows northeasterly to Manitoba Lake which, having no outlet, is strongly alkaline. Sounding Creek sectional sheet just published by the Topographical Survey, Department of the Interior, shows a considerable length of the creek from which it is named.

Germany's Newest Idea

In Germany, where new forms of transportation are constantly appearing, a foot-propelled bus is being used for leisurely hikes along the highways and byways. Its four industrial peddlers can keep the car doing six and a half miles an hour. The first car of this kind was built by four unemployed mechanics, but cars of similar type are gaining vogue.

Saskatchewan Fruit

Growing Campaign

Every Aspiration To Be Given In Order To Encourage Fruit Growing In The Province

According to a statement just issued by the Hon. James F. Bryant, who is in charge of the Saskatchewan Fruit Growing Campaign on the Institutional Farms of the Province, an excellent start has been made this fall.

The plans which have been carefully thought out and considered in detail for the establishment of fruit orchards on the Saskatchewan Government Institutional Farms, and for the promoting of fruit growing in Saskatchewan are now definitely being undertaken and work has commenced in connection with the trial nurseries and fruit breeding grounds at Regina, and the orchards on the Institutional Farms have been laid out and will be surrounded with windbreaks either this fall or early next spring.

Over eleven hundred grafted crabapple trees, over three hundred apple trees, of sixty named varieties, all on Siberian Crab roots and northern grown, have been planted and are either planted in the Government Nurseries or distributed to the Institutional Farms. The total area of an orchard plot 1,370 feet long and 376 feet wide has been laid out and the planting of the trees is well advanced. Six each of thirteen varieties of hardy named crabapple trees have already been shipped to Battleford. The balance of the eleven hundred have been heeled in at the Regina Nursery and will be sent out next spring. Some twenty-four hundred Siberian crabs have been obtained and on these will be grafted wood of named crabapples and standard apple stock.

Some seventy-five standard apple trees in six varieties have been obtained. These are all varieties that have proven satisfactory in Manitoba and in parts of Saskatchewan where they have been tried out by private owners. All these trees are either budded or crown grafted on Siberian crabapple roots and are perfectly hardy. The majority of these apple trees will be planted in the Regina Nursery in order to get ready for future planting and distribution.

About one hundred and eighty named varieties of standard apple trees, of the best varieties of the year old plum trees, of the best varieties produced to date in Western Canada, have been obtained. They have been planted in the Government Nurseries at Regina, to supply budding material for propagating these varieties. These grafted plums represent thirty-six varieties. One thousand five hundred and ninety seedling plum trees have been obtained for stock or for fruit.

In addition we have obtained from the Experimental Farm at Morden nearly nine bushels of plum seeds taken from early very hardy plum trees, as well as from a few prominent high quality, improved varieties developed on the Morden Farm. The plum seeds included the following varieties:

Winnipeg..... 8 pounds
Olson..... 5 "
Cardinal seedling..... 17 "
Native plum..... 150 "
Mixed plum..... 75 "
Early Nigra..... 100 "
Mammoth..... 30 "
Assiniboine seedling..... 25 "
Waneta..... 40 "
Femina seedling..... 30 "
Cree..... 8 "
Cheney..... 8 "
Assiniboine..... 15 "

A portion of these plum pits have been planted in the Regina Nursery and the balance divided among the Institutional Farm orchards, where they also have been planted. The pits are planted three inches deep about one to two inches apart in rows three feet apart so that they can cultivate between the rows, and a mulch is kept over the rows in order to retain moisture and assist in germination. Of the plum pits retained for the Regina Nursery, one half are ready being planted and the other half will be stratified in wet soil and planted in the spring. The pits are kept of the best germination under each method for future work.

The apple seeds and crabapple seed will be kept in the Regina Nursery. We have obtained 340 pounds of Western grown fruit with which the seed, mostly Siberian crab, will be taken, and in addition the Experimental Farm at Indian Head has just sent three sacks of apples and boxes of apple and plum seeds. The seedlings from these will be used as root stock on which to bud the standard varieties from cuttings and buds obtained from provincial private growers, and experimental farms. We are getting bud wood from one hundred varieties of apples and grafting it on the Siberian crab seedlings next spring. We have issued a booklet of information to all private orchard owners in Saskatchewan after they have eaten their apples and crabs, to save the seeds and forward them with the name of the variety to the Government Nurseries at Regina, as a voluntary contribution to the cause of fruit growing in Saskatchewan. From private nurseries at Regina, as a valuable material. Part of the apple and crab apple seed will be planted this fall and the balance will be kept in a cool cellar when it will be taken out in the spring, soaked in water for two days and then planted.

Mr. J. E. Park, the provincial landscape gardener, who has had a very valuable experience in experimental fruit work, is planning to introduce a set of records in the nursery and on each Institutional Farm, where bookkeeping entries will be made of each variety and the results obtained annually from them. A comparison will be made of the effect of local weather conditions at each farm on the different kinds of fruit, thus establishing the variety of each kind of fruit best suited to each locality.

When the orchard projects were

No more
dusting
for me!

at least not with old-fashioned dust cloths. I've found a better way.

Thousands of Canadian women know that her "better way" is the Wonder Paper. Made from clean news and paper pulp, scientifically treated with high-grade furniture polish, it dusts—as it cleans—as it polishes.

Wonder Paper is changing the old-established order of house-cleaning. One package of it appeals more to women than yards of old rags that spread dust and constantly need washing to be sanitary. You get twenty-five sheets of Wonder Paper for a quarter. Simply crumple a sheet into a soft, limp ball and use it for dusting, the floors, and the furniture, woodwork, and the floors. The results are a delight. In half the time and with half the effort, you get a necessary task done far more satisfactorily. And when you're through, throw away the piece of Wonder Paper. No shaking out, or washing, or dusting. Certainly you ought to try Wonder Paper.

Special Offer

WONDER PAPER is made by the makers of the famous PARASANI, the Heavy Waxed Paper in the Green Box. Not grocery, hardware and department stores have Appleford Wonder Paper in stock. If you haven't, just send this coupon and we'll give you a booklet entitled "Leflovers", containing one hundred recipes, as a bonus.

Appleford Paper Products, Ltd.,
Enclosed find 25c for which please send me one package of The Wonder Paper and your 100 recipes for "Leflovers".

First contemplated the proposals were taken up with the Hon. Robert Weir, Minister of Agriculture at Ottawa, and Dr. E. S. Archibald, Director of Dominion Experimental Farms, and both expressed their appreciation of the importance of the work, and promised their assistance and co-operation, which has been given in a wholehearted way by them and the officials of their departments engaged in fruit experimental work in Western Canada.

Mr. W. R. Leslie, Superintendent of the Dominion Experimental work at Morden, has been especially enthusiastic and helpful. Mr. Leslie has done some of the finest work in Western Canada in the matter of fruit growing. On my visit to the Morden farm this summer to inspect the work, and ascertain the best varieties suited to the different localities in Saskatchewan in which our Institutional Farms are located, Mr. Leslie spent a full half day showing me over the orchards. He is freely giving his advice as to the best varieties and is not only sharing his experience with the Department of Public Works, but is giving us some of the best material. Saskatchewan is getting the advantage of fifteen years of fruit experimentation at the Morden farm.

We have also received very valuable assistance from Mr. F. V. Hutton of the Northern Experimental Farm, from which our young fruit trees have mostly come. Mr. William Gibson, Superintendent of the Indian Head Experimental Farm and E. Wilson, formerly of Morden Station, but now in charge of Horticulture at Indian Head, are also giving us strong encouragement in our work and are co-operating in supplying material which will be sent in and distributed to our orchards and planted in the spring. They have sent in plum, apple and crabapple seedlings, and have assisted in the matter of northern grown stock is being given by Superintendent Hutton of Scott's Experimental Station.

Professor Patterson who is in charge of horticulture at the University of Saskatchewan is a strong proponent of the Government fruit growing campaign. He has welcomed the

HINARD'S
"KING OF PAIN"

opportunity of having his selections from controlled crosses, originated by him at the University, tested out on the Institutional farms in the different parts of the province. Professor Patterson has given us plum seeds in addition to those already mentioned and is supplying us with raspberry plants.

About eighteen hundred raspberry shrubs of thirty different varieties and fifty-seven hundred cuttings of black, red, and white currants of twenty-four different varieties have been obtained and are being heeled in and will be planted in the orchards in the spring between the rows of fruit trees. These are being received from Morden farm and planted in the spring in each orchard. We have received up to date 1,320 sand cherries for fruiting and experimental work.

We expect also to receive from Morden in the spring, a good supply of grape cuttings which will include the following varieties:

Alpha, Beta, Sauter, Hungarian, Selected native grapes from Riding Mountain, and Campbell Early.

From seven quarters of sweet blue grapes grown this year and ripened in George Watt's old garage, we have saved several and are being planted. These varieties trained to the fan system which eliminate the need of staking and in Manitoba have produced abundant crops of large fleshy, early maturing grapes. They will be grown on all the Institutional farms, and pergolas will be erected where they can be used for ornamental work instead of Virginia Creeper, and at the same time when established will produce excellent fruit for jam, jelly and grape juice.

We therefore feel that the Saskatchewan Government fruit growing campaign is full swing, and the plum trees which will result from nine bushels of plum pits and the other fruit trees will result from the same source. The fruit trees which we are planting each year as it is only by growing and testing out thousands of seedlings annually that we can select the best varieties to be developed.

Fruit growing in the largest field for scientific and experimental horticulture that exists in the prairies. This field has not been developed in Saskatchewan up to date although here and there private individuals have done excellent work. In co-operation with the Experimental Farms and University, the Department of Public Works, through the Institutional Farms, is going to use its best endeavor to encourage the growth of fruit on as many farm and home gardens as is possible in the province. In order to produce the best homes more attractive and to assist in diversified farming by making each home unit as self-sufficient as possible, the Saskatchewan fruit, and the result of our climate, sunshine and soil, is surpassed in flavor by no other fruit in Canada.

With the introduction of the fruit trees, there will be established a hive or two of bees on each farm to pollinate the fruit. If this proves satisfactory it will be the beginning of Bee culture and the production of honey on the Institutional Farms.

SUNDAY SCHOOL LESSON

NOVEMBER 20

STEWARDSHIP OF MONEY

Golden Text: "Take heed, and keep yourselves from all covetousness; for a man's life consisteth not in the abundance of his possessions."—Luke 12:15.

Lesson: Deuteronomy 8:7-18; Malachi 3:7-10; Luke 12:22-34; 1 Corinthians 16:1-4; 2 Corinthians 8:1-5; 9:1-16; 1 Timothy 6:17-19.

Devotional Reading: Matthew 6:19-24.

Explanations and Comments

Beware Of Forgetfulness Of God Becomes Of Pride In Possessions. Deuteronomy 8:11-14.—Moses foresees that in the Promised Land which his people are about to enter, they may become so prosperous as to forget God in not keeping His commandments and things which they are to do in the land of Canaan. He reminds them to "lift up" because of their fine houses, numerous flocks and herds, and abundance of silver and gold, Moses warns them, and reminds them of what they owe to God who brought them out of bondage in the land of Egypt.

It Is God Who Gives The Power To Acquire Wealth, Deuteronomy 8:18.—The first and fundamental principle of stewardship lies in God's ownership of all things. The God who created life the beginning has a priority claim upon all life. There can be no property, either without society or without God, which is not His. His value to property without society or without the God who guarantees all life. Stewardship is the recognition of this fact.

Liberality Is Blessed Of God, 2 Corinthians 9:11.—Generosity in giving is a beautiful thing, and Paul tells the Corinthians, should man hoard the greater part of his supply of wheat, being loth to part with it, he would have a scanty harvest from the small amount sown, and the hoarded grain, if kept too long, would spoil. It is from bountiful sowing that a bountiful harvest is reaped.

"Gifts and good deeds are seeds sown which will yield a harvest just as surely as the grains of wheat one may sow in his field. They will yield many different harvests. The blessings they carry to those who receive them are one harvest. The blessings that the mere act of giving brings back to the giver is another; for the more we are blessed to give than to receive."—J. R. Miller.

Miss Gertrude Dutton
tells why she makes her

Devil's Food Layer Cake

with Magic Baking Powder

"I know from experience," says the cookery expert throughout the Dominion, "that Magic Baking Powder makes most baked dishes look and taste better. Its uniform leavening quality gives delectable baking results."

And Miss Dutton's praise of Magic is seconded by the majority of dietitians and cookery experts throughout the Dominion. They use Magic exclusively because they know it is pure, and always uniform.

Canadian housewives, too, prefer Magic. In fact, Magic outsells all other baking powders combined. For delicious layer cakes, light tender biscuits, delicious pastry—follow Miss Dutton's advice. Use Magic Baking Powder.

FREE COOK BOOK—When you bake at home, the new Magic Cook Book will give you dozens of recipes for delicious baked foods. Write to Standard Brands Ltd., Fraser Ave. and Liberty St., Toronto, Ontario.

Tree-Planting Record
New York State has planted 22,000,000 trees on 27,000 acres in the past year—probably a tree planting record for the entire world. This is exclusive of trees planted by counties, cities and private conservations.

Canada's One-Cent Coins
The issue of 18,000,000 Canadian one-cent pieces during the past years by the Department of Finance required 66 tons of copper and the coins placed side by side would extend 221 miles.

Nearly 140,000,000 tons of coal were burned in England in the last 12 months.

Fagged out... always melancholy and blue... she should take Lydia E. Pinkham's Vegetable Compound. Its tonic action builds up the system. Try it.

THE ATTITUDE OF BRITAIN ON DISARMAMENT

London, Eng.—"We are endeavoring to transmute into practical form the overwhelming desire and passionate hope of the British people to make disarmament an accomplished fact."

To a world perplexed with the assertions of various powers concerning the vital question of disarmament, whose efforts towards that end have thus far met with small success, Sir John Simon made the foregoing statement in a speech in a crowded House of Commons.

It was significant that the British government chose, through its foreign secretary, to announce its attitude to the disarmament problem on the eve of Armistice Day. "A fair meeting of Germany's claims on the principle of equality," was favored by Sir John, who pleaded that "the European states should join in a solemn affirmation that they will not in any circumstances attempt to resolve any present or future differences by resort to force."

Recognition of the right to parity in arms would entail on Germany, along with others, the acceptance of this corresponding obligation of an assurance of peace. Sir John recognized the fact that the armististations imposed on Germany by the Treaty of Versailles were to be preliminary to a general limitation of arms. It was not the desire of other countries to inflict permanent inferiority upon Germany but the hesitancy to change the Versailles Treaty restrictions was from anxiety as to the developments that might arise from the resulting situation, with the possible disturbing of the tranquility of Europe.

These further principles were laid down on behalf of the government of Great Britain: 1. That the limitation of Germany's armaments by Versailles provisions in the Treaty of Versailles should be superseded; Any limitation of Germany's armaments should be expressed in a document that would at the same time limit the armaments of other nations.

2. The duration of such a disarmament convention should be the same for Germany as for other countries.

3. The British Government was willing in co-operation with other members of the disarmament conference to see the principle of equality in the prohibited classes of armaments (chemical warfare, etc.) was embodied in the new document.

Railway Co-Operation

C.N.R. President Believes Two Systems Should Be Under Separate Management

Ottawa, Ont.—Canada's two major railway systems should co-operate to avoid wasteful expenditures but remain under separate management, S. J. Hungerford, president of the Canadian National Railways, to the senate committee reviewing railway legislation, proposed recently.

The National president sent the following telegram to Senator George P. Graham, chairman of the committee: "Canadian National has no particular further representations to make as situation stands at present but desires to reiterate our conviction that the two systems should be under separate management but in active co-operation with a view to avoidance of any wasteful expenditures and unsound competition."

E. W. Beatty, president of the Canadian Pacific Railway, will appear before the committee next week to make representations. Officials of the Labor unions also will appear next week but Mr. Hungerford's telegram indicated the Canadian National was not seeking to make representations.

Banana Crop Damaged

Jamaica Hurricane Causes Loss Of Three Millions Dollars

Kingston, Jamaica.—Fully 50 per cent. of the banana cultivations on this island were wiped out by a terrific storm which struck West Jamaica.

The centre of the storm hit Point Negril, the western extremity of the island, and the wind registered 75 miles an hour. The damage was estimated at \$3,000,000. There was no loss of life.

Five taken 30 lives in the United States every day.

London's 142 hospitals had a total income of \$19,000,000 last year.

Banker Fails Bandit

Vancouver Hold-Up Is Frustrated By Action Of Bank Manager

Vancouver, B.C.—Less than two hours after a lone gunman attempted to hold up the Bank of Montreal and Oak Street branch of the Royal Bank of Canada, police arrested a suspect who is being held for questioning.

The man was arrested at his home by officers, who stated that on searching his room they found a revolver from which a bullet had been fired recently.

Quick thinking and prompt action by E. Devereaux, manager of the branch, foiled the holdup attempt and demonstrated again that the manager was no easy mark for "stick ups."

Shortly before noon a man entered the bank carrying a satchel. Going to Devereaux's desk he pointed a gun at the manager. Devereaux immediately dropped behind the counter and reached for his own gun. The bandit fired one shot and fled in a car, which was recovered by police 30 minutes later and discovered to have been stolen from H. Wright.

On July 28 last two men entered the bank and attempted to hold up Devereaux. The manager rushed into his office and fired several shots through the window to attract attention, frightening the bandits, who fled in a waiting car.

New Rules Issued

Conditions Under Which Civil Servants May Hold Municipal Offices

Ottawa, Ont.—The government has issued a list of conditions under which civil servants may hold municipal offices. The order applies throughout Canada.

In all cases permission must be secured from Ottawa before a civil servant contests a municipal election. If the post he seeks carries a salary or remuneration of \$500 or less he may hold it without severing his connection with the government.

If the salary is above that figure, he must secure leave of absence without pay, devoting his full time to the municipal office.

Caught In Flood Of Oil

Two Men Drowned In Peculiar Accident At Mount Royal

Montreal, Que.—Caught in a flood of fuel oil, Flacide Bourgeois, 45, and another man were drowned at the plant of the Imperial Oil Company when a huge tank containing 30,000 barrels of fuel oil burst.

The men were digging nearby, standing in an excavation several feet deep. The gush of oil from the broken tank overwhelmed them and both drowned before help arrived. Details as to how the tank broke were not immediately available, but it was stated there was no explosion of any kind. One body was recovered.

Build More Elevators

Vancouver Only Port In World To Increase Elevator Capacity

Vancouver, B.C.—By December 15, Vancouver's grain elevator capacity will be approximately 1,600,000 bushels greater than at present, this being the only port in the world today where additional elevator construction is being installed.

Three additions to grain elevators are nearing completion, two of which are expected to be finished by December 1. Thus, Vancouver's present capacity of 16,205,000 bushels will be increased to 17,830,000 bushels.

No Request For Relief

Ottawa, Ont.—The Saskatchewan Government has made no application to the Department of Labor for relief of farmers in the dried-out areas of the province. Hon. W. A. Gordon said in the House of Commons. He was replying to a question asked by Dr. Thomas Donnelly, Liberal, Willow Bunch.

To Market Canadian Products

Toronto, Ont.—The Retail Merchants' Association of Canada announced it would co-operate with the commerce department of Queen's University, Kingston, in plans for an exhaustive study to formulate definite information regarding domestic distribution of Canadian products.

Geese Tangle Wire Lines

Winnipeg, Man.—Four Manitoba towns—Holland, Glenboro, Balcarres and Cypress River—were without electric power for several hours following an aerial attack by a flock of geese on transmission lines. The birds caused a short-circuit, but only three of them were killed.

Labor Statistics

471,068 Canadians Were Unemployed On June 1st.

Ottawa, Ont.—On June 1, 1931, the date of the Dominion-wide census, Canada's unemployed total stood at 471,068, according to a return tabled by Hon. H. H. Stevens, Minister of Trade and Commerce, in the House of Commons. The wage-earners numbered 2,664,879, of whom 81.39 per cent. were at work.

The number of "unemployed in the ordinary meaning of the term" was 392,809, or 15.32 of all wage-earners, since these persons recorded themselves to have "no job." Others were laid off temporarily, some were out of work through sickness, accidents and lock-outs.

Of the wage-earners, 2,017,006 were males, and 547,273 females. Of the former, 422,964 were not at work, and of the latter, 48,674.

MAJORITY FOR ROOSEVELT MAY PROVE RECORD

Washington.—Backgrounding the election of Franklin Delano Roosevelt as United States president by what promises to be the greatest electoral majority in the history of the country, Democratic supremacy in the next House of Representatives passed the three-to-one mark as completion of vote-counting neared.

Meanwhile the party figures in the senate approached the border of a two-to-one margin.

Some 70 house seats remained to be heard from, however.

It looked as though Democratic majorities would be increased instead of decreased, but there was nothing finally conclusive as to the final lineup.

From Connecticut to the state of Washington, the mighty rush of Democratic ballots that bore the New York Governor to presidency over Herbert Hoover, took heavy and hourly growing toll of "G.O.P." legislators, some of them veterans of many years at the capitol.

Outstanding among the latest Republican old guard victims were the veteran Senator Wesley L. Jones of Washington, and Senator Tasker L. Oddie of Nevada. Their victorious Democratic adversaries were Homer T. Bone, and Patrick A. McCarran.

Other familiar figures who fell before the Democratic hurricane were Read Smoot of Utah, dean of the senate, where he has served for 30 years; George H. Moses for New Hampshire, president pro tem; James E. Watson of Indiana, Republican leader, and Hiram Bingham of Connecticut, administration stalwart.

The lineup for the short session of the present congress, which expires March 4, was in doubt, with the Democrats holding 48 seats, the Republicans 46, and leading in one.

BRITISH MARQUESS MAY CONQUER EVEREST BY AIR

LORD CLYDE DALE. - MR. EVEREST - MAHARAJA OF NEPAL

With the chief object of promoting British prestige—particularly in India—the Marquess of Douglas and Clyde, British aviation enthusiast and Member of Parliament, with a few chosen companions, will take off from Northern Bengal sometime within the next few months, in an attempt to fly over the summit of Mount Everest, giant of the Himalayas. Clyde is being supported in his petitious venture by the British Air Ministry and India Office, and the Maharajah of Nepal, in whose territory the mountain is situated, has given permission for the flight. Two planes will make the attempt. One will photograph the other if, and when, it crosses the summit of Everest. This is to provide authentic proof that the feat has actually been accomplished.

HUNGER LEADER

Wal Hannington, the militant organizer of the London "hunger march" which recently resulted in serious rioting in the British Capital, Hannington has been arrested, charged with "inciting to mutiny" and he will probably receive a stiff sentence.

Still For Prohibition

Andrew Volstead Has Not Changed His Viewpoint

St. Paul, Minn.—Andrew J. Volstead said he was still convinced prohibition is the thing for the United States.

Asked to comment on gains made by the wets in the election, he replied: "I have seen too many elections to have national sentiment mean anything to me. I am still for prohibition." He refused to amplify.

Volstead, co-author of the dry act, pertaining his name, is legal adviser to the district prohibition administrator here.

Free State Will Not Pay Land Annuities

Government Not Giving In To Britain Says De Valera

Dublin, Irish Free State.—Eamon de Valera, president of the council of the Irish Free State, told members of the Fianna Fail party, of which he is a member, that "as long as this government is concerned the land annuities will never be paid."

"The new duties against Irish produce we had expected. We knew that the United Kingdom would attempt to bully and coerce us and if we give in she will always do so," he said.

Balloon Is Released

Calgary, Alberta.—Fifth to be released since September, a large meteorological balloon went soaring skywards from the municipal airport here to record pressure and temperature in the stratosphere, eight to 10 miles above the ground. The balloon was released by C. H. Bromley, representative of the Dominion Meteorological Bureau here.

Wife Of Stalin Is Dead

Most Powerful Figure In Soviet Russia Is Bereaved

Moscow, Russia.—Nadya Allilueva, wife of Joseph Stalin, most powerful figure in all Soviet Russia, but herself a retiring woman who lived plainly, is dead.

The Tass agency, official Soviet news organization, announced her death but gave no details.

She was 36 years old. Only a few months ago she had completed a three-year course at the All-Union Industrial Academy which qualified her as an expert in the production of artificial silk and made her eligible to a high administrative-technical post in an important section of the Soviet textile industry.

In addition to Stalin, their two children—a boy of 12 and a girl of seven—survive her. There also is a stepchild, Stalin's son by a previous marriage, who is 23.

Soldiers On Guard

Militia Men Stationed At Federal Penitentiaries In West

Winnipeg, Minn.—Steel-helmeted militia men, with full field equipment and machine guns, are stationed at federal penitentiaries in Manitoba and Saskatchewan.

Twenty-five men were in each detachment to leave Winnipeg fully equipped and supplied with a plentiful quantity of ammunition. The troops dispatched to Prince Albert carried a truck load of ammunition, while both detachments had machine guns.

There are nearly 600 convicts at Prince Albert, while those housed at Stony Mountain total several hundred, probably near the thousand mark.

Table Supplementary Estimates In House

Total Of \$1,534,957 Added For Present Fiscal Year

Ottawa, Ont.—Further supplementary estimates for the present fiscal year, totalling \$1,534,957, were tabled in the House of Commons by Hon. E. N. Rhodes, Minister of Finance.

The largest single item in the list is an appropriation of \$975,000, a further amount required for unemployment relief under the administration of the Department of Pensions and National Health.

BRITAIN READY TO AID CAUSE OF WORLD PEACE

London, Eng.—Stanley Baldwin, Lord President of the Council and leader of the Conservatives in the House of Commons, told guests at the Lord Mayor's banquet, Great Britain could make no further step toward disarmament without similar moves on the part of other nations.

Mr. Baldwin, speaking in place of Prime Minister Ramsay MacDonald who was absent on doctor's orders, declared: "The time has come to an end when Britain can proceed with unilateral disarmament."

He added, however, that the United Kingdom was ready at any time to join other nations in plans which might reduce armaments and bring assurance of world peace.

The Conservative leader pleaded for settlement of the war debt problem. "It is essential to the world that ratification of the Lausanne settlements on reparations should now become possible and the work begun there should be completed," he said.

He added he wished the success which had attended the Lausanne parley had been reflected in the world disarmament conference, but reminded his hearers that in accordance with the terms of the "gentlemen's agreement," fulfillment of the accords reached at Lausanne depends on a more lenient debt settlement between creditor and debtor nations.

He reiterated that Great Britain was resolved to stand by her obligations undertaken under the covenant of the League of Nations, and would continue to co-operate with the League in every respect.

From disarmament and war debts, Mr. Baldwin turned to affairs within the empire and to prospects of increased prosperity in empire countries as a result of the Ottawa economic conference.

Of that conference he said: "Patience, forbearance, sympathy and a sense of one another's requirement, we believe, laid the foundations leading to increased trade between us by lowering economic barriers."

WHEAT CROP ESTIMATE AT A LOWER FIGURE

Ottawa, Ont.—Canada's total wheat crop is now estimated at 35,800,000 bushels less than it was in September, by the Dominion Bureau of Statistics. In a report released Thursday afternoon, November 10, the total wheat crop for the entire Dominion was placed at 431,200,000 bushels compared with September estimate of 467,000,000. Most of the decrease is in the prairie provinces where Thursday's estimate was 411,000,000, and in the September estimate 446,000,000.

Not only are the estimates for wheat down but for other grains as well. In the prairie provinces the estimate for oats is now placed at 247,300,000 bushels. In September it was estimated at 274,700,000 bushels.

"The obvious explanation for the reduction," the report states, "lies in the impossibility of estimating the effects of drought and other depressing influences on yield until actual threshing operations were in progress."

The heavy marketings up to date may indicate that the correspondents on whose returns the estimate is based, have been unduly pessimistic, the report explains.

The crop report Thursday was eagerly awaited by western members of the House of Commons. "It may help the price of wheat some," one of them suggested.

For Sound Money

Bennett Scores Propounders Of New Monetary System

Toronto, Ont.—The credit of Canada has been preserved to an extent that it stands pre-eminently among the nations of the world. From Prime Minister R. B. Bennett came this declaration as he addressed delegates to the Ontario Conservative Association annual banquet.

To the propounders of a new monetary system for the use of printing presses to turn out more dollar bills, Premier Bennett issued a rebuke. "If we do it we destroy this country, and its credit, and once you do that the appetite for more becomes insatiable. It became so insatiable in Germany that it took about 1,000,000 Marks to post a letter."

Doubts Conference Benefits

Hon. W. R. Motherwell Says Agreement Injures Trade

Ottawa, Ont.—"If the 1930 Imperial Conference was humbug, the last Imperial Conference was a double-eyed, twice-distilled quintessence of humbug," declared Hon. W. R. Motherwell (Lib, Melville), in the House of Commons. He continued debate on second reading of the bill to ratify the Canada-United Kingdom trade agreement.

He was opposed to the agreement, said the former minister of agriculture, for several reasons. He objected to the government's methods of giving preferences by raising tariffs against the rest of the world. Its effect would be to injure Canada's trade.

The agreement had been arrived at under the "threat" of an imposition of tariffs by the United Kingdom on November 15, said Mr. Motherwell.

Mr. Hon. Stanley Baldwin had given Canadian wheat a preference with one hand and taken it away with the other, when he insisted that the wheat be sold at world prices, Mr. Motherwell said. The only way to secure a preference was by way of a quota.

He had looked for some remedial action on the part of the British government in connection with the necessity of routing Canadian grain by Canadian ports in order to obtain the preference. He could not believe that the government would knowingly interfere with a long-established trade route, via Buffalo and New York.

It would cost twice as much to convey the wheat by way of Halifax and Saint John, in the increased costs of freight and storage. While he was prepared to patronize Canadian ports, he did not wish to do so at a price of four or five cents extra in the way of expenses.

Mr. Motherwell felt that the government's first act at the conference should have been to adjust the exchange situation. If this could not be achieved among "members of the same family," how did the Prime Minister hope to attain it at an international conference among foreigners?

For World Peace

A Peaceful Atlantic All That Is Needed Says Premier Of France

Let Britain and America "give us a peaceful Atlantic and we, single-handed, will guarantee the peace of the world," Premier Herriot told the Anglo-American Press Association in Paris, in a speech in which he compared international peace with marriage.

"Peace is like marriage between two countries," Herriot said. "Each gives formal promises to respect mutual rights."

"I have been foreign minister several times, but have been a mayor for many years," Herriot said. "He has been mayor of Lyons for 27 years. As a mayor, one asks two people whether they wish to live in peace and harmony together."

Herriot said he had been a lifelong pacifist, but a practical one. "I don't intend building a castle in the air, illusions in the sky," he said. "I want a practical, mutual peace machine built on the solid ground of Europe."

"As a Frenchman, I have a proposition to make to you British and Americans. Give us a peaceful Atlantic, and we, single-handed, will guarantee the peace of the world."

Evidence Of Herring Find Near Churchill

Species Appear To Be Same As Caught On Norway Coast

Discovery of evidence that salt water herring is to be found in Hudson Bay was told by John Ingebrigtsen, Norwegian fisherman, who arrived in the Pas after spending the summer at Churchill, from whence he cruised again the west coast of the bay while on fishing and freighting trips.

Discovery of the herring was made by Ingebrigtsen at Seny Island, 160 miles north of Churchill. He had found some of the fish washed up on shore. They were approximately eight inches in length and appeared to be of the same species as are caught by fishermen on the coast of Norway.

He took a few samples picked up on the shore to Churchill. He was not equipped with the proper nets to catch any of the herring. Ingebrigtsen said he had also found this summer a new kind of bait used for bay fishing. It was a small fish "apparently plentiful in the bay waters. He thinks perhaps it is a species of capelin. It is the third kind of bait he has found in Hudson Bay, having discovered two kinds while out last summer.

Gas Lighting Still Used

London Has Fifty Thousand Street Lamps Lighted Every Night

You would think, perhaps, that gas illumination belongs to a disappearing epoch—didn't Robert Louis Stevenson write a poem about Leerie and Lamp-lighter? Yet the Gas Light and Coke Company, of London, still carries on, still lights every night nearly 50,000 street lamps. It has just signed a contract with the City of Westminster—that rich municipality which is really one of London's boroughs, and which amongst its 55 miles of streets, contains such famous ones as Pall Mall, Piccadilly, Regent Street and Whitehall—for another fifteen years.

A great contract, if you like, affecting more than half the West End of London; and the Gas Light and Coke Company recently took a few half-page ads in the most expensive papers to announce the fact.

World Is "Coming Back"

Recovery Will Be Hastened If Every-one Does Their Bit

Nothing is now surer than that the world is "coming back." Besides the fact that old "Cosmos" has wangled through a dozen or more such crises, there is in the air every sign of returning recuperation. "The first tree put forth her green flags, and the vines with tender grapes give a good smell." For, in the winter is past, and the voice of the turtle is heard in the land. The recovery will be hastened, in the meantime if those of us who have not yet perceived the coming of the dawn will close our mouths, take a hitch on our belt and do what our hands find to do with our might. Let us do less talking and more real work.—S. Davidson.

The oldest town in the world is said to be the ruins of Tepe Gawra, in northern Mesopotamia.

The bleaching properties of chlorase were first shown by a French chemist, in 1784.

Commodity prices in Japan are increasing.

W. N. U. 1908

ALL ROADS LED TO LONDON BUT THE MARCHERS OUTSTAYED THEIR WELCOME

Our pictures show two small groups of hunger marchers who descended upon the British capital intent on presenting a petition to the House of Commons. They were unsuccessful and after giving the London police an anxious time for three days departed for home. Left, one of the women demonstrators is given a lift by some of the boys from Brighton. Right, some of the boys in the vanguard carry the banner and march to the tunes from a harmonica.

Cleaning Royal Clocks

Twenty-Four Men Now Busy At Buckingham Palace

Twenty-four men are busy at Buckingham Palace giving the king's clocks their autumn clean.

The work will occupy two months, for they will clean and adjust every one of the wonderful collection of more than 160 clocks at the palace. Even then most of the clocks in the royal collection will remain to be done, for at Windsor Castle there are another 360 belonging to the king, as well as about 250 more at Sandringham and Balmoral and other royal residences.

The king's favorite timepiece is a small clock with a plain mahogany case and a simple plain dial, on the desk of his study in Buckingham Palace, where he does much of his official work. It has been in his possession for many years, and by it he regulates his many audiences and interviews.

The king is one of the most punctual men in the country, and is never late for an official function or a private engagement, so that all the palace clocks must be accurate. It is an expert's duty to wind and adjust them every day.

The most curious clock in the collection is the one made in France in the time of Louis XV., in the form of a negro's head, with one eye showing the hour and the other the minute.

While great care is taken at Buckingham Palace to keep every clock accurate, at Sandringham, the king's estate in Norfolk, every clock is half an hour fast.

The generally accepted explanation of this is that King Edward wished to make it easier for himself to be in time for engagements, but the real reason is that King Edward, impatient at the shortness of the autumn days when most of his shooting was done, forestalled summer time by ordering the clocks to be advanced. The custom has been maintained ever since.

Has Sense Of Humor

Gandhi Had Clever Reply Ready For Blustering American

It is difficult to associate Mr. Gandhi with a sense of humor, but an artist who painted him while he was in London told of a rather blustering American who burst in while the Mahatma was absorbed in meditation, reports the News of the World. "Say, Mr. Gandhi," said the visitor, "what good would it do if your country was freed from the English? You would fall into the hands of the Germans or the French or the Russians in no time." "Would that matter?" asked Gandhi. "If we were able to keep out of the hands of the Americans?"

No Thanks To Him

"This is a wonderful suit I am wearing." "It looks very ordinary." "But the wool came from Australia. English merchants sold it to a Scottish factory. It was woven in Saxony, made into a suit in Berlin." "Nothing wonderful about that." "No, the wonder is that so many people can get a living out of something I have never paid for!"

Won Outstanding Honor

Field Marshal von Mackensen, who, like Hindenburg, is one of the oldest survivors of the Great War, celebrated his eighty-fourth birthday a few weeks ago. One of the many distinctions he has won is that he was the first German member of humble stock to reach the rank of General Field Marshal. He is the son of a farmer.

Airport Of The Skies

Plan Huge Overhead Aerodrome In London, England

An overhead aerodrome in the shape of a gigantic wheel half a mile in diameter, at an estimated cost of £25,000,000, is a proposal of London promoters, who hope to have a bill introduced in parliament in the near future for permission to build it. The proposed airport of the skies is to be supported by 36 skyscrapers, in the heart of Central London, over the railway lines behind King's Cross and St. Pancras stations.

The scheme as outlined by W. Craven-Ellis, Conservative M.P. for Southampton, one of the promoters, is as follows:

There will be eight spokes in the wheel design of the overhead aerodrome so that aeroplanes can always land no matter what direction the wind. Each spoke and surrounding rim will be 300 feet wide—three times the width of London Bridge.

The 36 buildings which will form the legs of the aerodrome will be 120 feet high and will be used as warehouses, factories for light industries, flats and offices. One of them will be a hotel. The flats will house 800 families at a rental of 10 shillings a week.

License Suspended For Life

Punishment Imposed By English Magistrate On Drunken Driver

Captain Harry St. Clair Dyson, who had a fine career in the war, was convicted in England by the Southend bench of magistrates on a charge of driving a motor car when under the influence of drink, was fined \$500 or two months' imprisonment, and his driver's license was suspended for the remainder of his life. It was his third conviction on similar charges since 1927.

After the war he was associated with Lord Byng in connection with the distribution of the United Service Fund, and then went to British West Africa, where he contracted malaria.

British Millers Grind Own Wheat

Since the commencement of the present crop year British mills have been using a high percentage of Canadian wheat—undoubtedly the largest percentage since 1928. The re-establishment of a high percentage of Canadian wheat in the mixtures used by British mills is a factor of importance, says a report of the Dominion Bureau of Statistics.

Manitoba Sells Barley To British Brewers

Representative Pleased With Samples From Swan River Valley

A representative of the Associated Brewers has been in Manitoba for some time, securing a shipment of about 60,000 bushels of Manitoba barley to try out for malting purposes.

He has secured shipments from all parts of the province and is taking three carloads from the following: C. W. Banks, Benito; C. H. Goodman, Benito; Wm. Gordon, Kentville.

Major Shaw expressed himself as very pleased with the Valley samples, and if he can possibly do so will arrange to pay a visit to Swan River before he returns to England.

Some of these shipments are being sacked and kept separate from the balance of the grain shipped, so that a detailed report can be given as to their suitability for malting purposes.

Sound Rule For Driving

If Driver "Watches Other Fellow" Safety Is Assured

One of the sound rules for safe driving is to "watch the other fellow." When we form the habit of doing just that, we keep our eyes on the road ahead. When we keep our eyes on the road ahead it's ever so much easier to keep our minds on the all-important job of driving safely.

Watching the other fellow develops a new interest in him, too. It fosters a badly needed highway courtesy. It is a constant reminder that the road is owned by all, and not by any one driver. It tells us that the other fellow has equal rights with our own, and that if we trifling on these rights we do so at our own peril.—Brandon Sun.

Learn English By Singing

English is being taught Germans of Bavaria through singing. The Bavarian Broadcasting Company is broadcasting simple folk songs in English, the teacher at the microphone singing slowly and asking listeners to repeat the song after him. Every word is then explained by rhyme or song. He is assisted by a sextette. The system of instruction was originated by a Bavarian schoolmaster, imported from China, who says it was successful there.

A movie man in Hollywood has had the same valet for eight years and the same chauffeur fourteen, but not the same wife.

Plays Under A Handicap

Football Star Although Deaf Gets Signs By Finger System

Football signals given in sign language is something new for the grid-iron.

But that is the way Bibbo Monaghan, big blonde, deaf and dumb right end of the Memphis Tigers, professional football team, learns what the next play is to be.

He lost his hearing when he was seven. He can talk, but his voice has the unnatural sound peculiar to deaf persons. To hear Bibbo tell it, deafness is a great help.

"I don't waste my breath talking," he explains. "And I believe I can see more than most players. My eyes are my ears, also, so they are well developed."

And another thing, when opposing players get to whispering about plays, Monaghan can sometimes read their lips.

Bibbo attended the school for the deaf and dumb at Jackson, Miss., where he starred in athletics. He then went to Galludet College, Washington, D.C., where he was a four-letter man.

This is his first season as a professional athlete.

"Frosty" Peters, quarterback on the Tigers and former University of Illinois football star, is Bibbo's buddy. "Frosty" gives him the signals in sign language and takes a special interest to see that Monaghan understands what is to come next.

Bibbo can hear the referee's whistle, of course, so he takes no chances. "I always hold the guy till I'm sure," he says. "Most of the times I know when the whistle has blown, though, by seeing the other players stop."

One Reason Whaling Trade Has Declined

Sale Of Articles Containing Spermaceti Has Fallen Off

One of the reasons for curtailment of whaling operations off the Pacific coast during the last two seasons is that women are showing preference for articles that do not contain spermaceti, once a treasured article of world trade.

This is the opinion of William Schupp, president of Consolidated Whaling Corporation, which operates the only fleet of whaling vessels out of British Columbia ports.

Spermaceti is the wax found in the head cavities and blubber of the sperm whale and this product was once used almost exclusively in the manufacture of women's face creams and other cosmetics. The substance is also used for making candles of standard photometric value, in the dressing of fabrics, in medicines and surgery, and especially in cerates, ointments, and in cosmetic preparations.

Whatever the reason, the market for spermaceti and sperm oil is now very low. The north Pacific has the largest sperm whales in the world, according to Mr. Schupp. From 50 to 60 per cent of the world's supply of spermaceti comes from the Queen Charlotte Island stations.

Wants To Trade Stamps

Boy Patient In Victoria Hospital Writes To King George

Little Robert Guay, who is a cot patient in the Queen Alexandra Solarium, not far from Victoria, B.C., wants King George to swap stamps with him.

Bobby is starting a collection and he has some extra stamps he wants to exchange. He heard the other day that King George has one of the best collections in the world and decided to put him on his list. So he wrote the following letter: "Dear King George V.: I am sending you these stamps to see if you would like to swap some of yours for them."

"The Solarium is a nice place and it is facing the sea. I have a big hip. I have been here quite a while. Junior is in the next bed to me. He has a bad back. We are getting better. I hope you are fine."

"I hope you will like the stamps. If you have them already you can trade them for some others."

"With good wishes, yours truly, "Robert Guay."

Bobby is quite confident that the King will reply. He thinks it quite natural that he should write to His Majesty.

Gambia, West Africa, has established a finger print department with the local bandmaster in charge as a sideline.

Customer: "So this is your last house?" Estate Agent: "Yes; last if not leased."

Untouchables Live Lower Than Beasts

Caste Lines Have Been Maintained In India Thousands Of Years

There are four sharply divided Hindu castes and each of these is split into hundreds of sects, equally sharply divided. For thousands of years, through countless generations, these caste lines have been maintained in all their rigidity.

First come the proud Brahmins, or "earthly gods," whose priests have a monopoly in the Hindu temples. Second are the Kshatriyas, or fighting men.

Third are the Vaishyas, or tillers of the soil. (Gandhi was born into this caste.)

Fourth are the Sudras, or servants.

Beneath all these come India's 60,000,000 "untouchables," lowest of the low. They are doomed, by Hindu law, to the chains of mental and spiritual slavery for life, and so are their children for all time to come.

For no "untouchable" or his children may ever rise above his lowly station. His only hope is in reincarnation, that he may be born into a higher caste when he next appears on earth. This he asks in his prayers.

Crushed and beaten by centuries of oppression and discrimination, many of these 60,000,000 outcasts live lower than the beasts of the field. Some of them live on carrion, or on rats and snakes. When they seek jobs they are permitted to hold only such low positions as scavengers, sewer cleaners, street sweepers.

If a high-caste Brahmin mentions the name of an "untouchable" he must spit after doing so. If the latter's shadow should chance to fall upon him the Brahmin must undergo an elaborate "purification rite" conducted by the priests of the temple, so that he may be cleansed in body and soul.

If the "untouchable" desires to buy from a shop-keeper of higher caste he must not enter the store. From some distance away, he shouts to the shop-keeper what he wants, places his few precious coins on the ground and then retreats. The shop-keeper comes out with the purchase, places it upon the ground, picks up the money.

Such are the people for whom Gandhi went on his successful hunger strike. Not only did the wretched little proletariat of India's new day seek to gain better recognition for them, but he also sought to smash the injustice practiced upon them by their own people by reason of the caste blight. Two hundred years before Christ, India's great King Asoka tried to do the same thing that Gandhi is trying to do in 1932. Asoka failed.

But whether it is to be done by London, Delhi, or by Gandhi, the job of curing India's political and racial maladies is a tremendous one. Development and modernization is bound to be a gigantic task in a land that has slumbered through centuries with a philosophy of abnegation and humility which is epitomized in the Hindu proverb: "It is better to sit than to walk, to lie than to sit, to sleep than to wake, and death is best of all."

Treatment For Anemia

Toronto Doctor Has Perfected New and Effective Syrup

Dr. G. H. W. Lucas, associate professor of pharmacy and pharmacology at the University of Toronto, is responsible for the preparation of a new and effective syrup for the treatment of anemia.

The preparation has been tested with success by doctors not only upon themselves but upon patients.

The new preparation is said to be effective for those forms of anemia requiring iron, which does not include pernicious anemia.

The preparation will not be made by the university, it was stated, but the recipe will be available to physicians.

Frequent Lightning Flashes

During Four-Hour Storm In Germany 5,000 Officially Recorded

Within four hours 5,000 flashes of lightning were counted by an official photographic instrument during heavy thunderstorms in West Germany and the Dutch Frontier districts. The instrument was in Nordhorn, Westphalia. In one and one-half hours between 30 and 40 discharges a minute were registered. Observers say that during the four hours the sky was a sea of flames.

Certified Sea-Cooks

Every sea-going craft of 1,000 tons or over has to carry a certified sea-cook, by order of the Board of Trade. These men have to pass three grades before becoming proficient, when they can earn from £12 to £40 a month.

THE HOUSE OF DREAMS-COME-TRUE

— BY —
MARGARET FIEDLER
Author of
"The Splendid Thing," "The Hermit
Of Far East,"
Hodder & Stoughton, Ltd., London.

CHAPTER XXXVII.—Continued
She was lying on her back in the
shady wood whether they had ridden
out to lunch that day, staring up at
the blue sky overhead which
showed between the interlacing
branches of the trees. The remainder
of the party were grouped around her,
reclining in various attitudes of a
"dolce far niente" nature, while from
a little distance away, where the
horses were picketed in charge of a
groom, came the drowsy, rhythmic
sound of the munching of corn, punctuated by an occasional stamp of an impatient hoof.

"Yes, it's been good," agreed Lady
Anne. "I shall never settle down
again properly as a dowager at the
Dower House!" And she laughed gleefully.

To her, it had been almost like a
return to the days of her youth, for
"her four children"—as she called them
had insisted on her sharing in all
their active pursuits, and Lady
Anne, who in her girlhood and early
married life had been a first-class
horsewoman and a magnificent swimmer,
had consented "somewhere."

Blaise pulled himself lazily up into
a sitting posture and glanced towards
the crimson glow of western sun
where it struck athwart the tall
trunks of the trees.

"You'll none of you live to go back
to England. Instead, you'll be dying
of pneumonia and a few other complaints—if we don't get a move on
soon," he observed. "It's almost sunset,
and after that it grows ominously
chilly in this eastern paradise of
Jean's. Besides, I fancy it's going to
blow great gusts before long."

It was true. Already a little chill
whisper of wind was shaking the tops
of the trees, and before the party was
fairly mounted and away, the whisper
had changed to a shrill whistling, heralding
the big gale which drove along behind
the innocent seeming breeze
which at first had barely rocked the
tallest branches.

It was a longish ride back to Beirne-
felds, and the sun had dipped below
the horizon in a sullen splendour of
purple and red before the shoulders
of the hill, upon the further side of
which the castle stood, came into
sight. Now and again the moon peered
out between the racing, wind-driven
clouds, clearly lining the bold
black curve of the hill against a back-
ground of lowering sky.

For COLDS

"It always use BABY'S OWN TABLETS
to break up my baby's cold,"
writes Mrs. Wilbert Colquhoun, Stur-
geon Falls, Ont.
"When I see a cold coming on, it is to
BABY'S OWN TABLETS that I
turn," writes Mrs. Robert Greenhorn,
Phillipsville, Ont.
Mothers everywhere report in like vein
of the safe, sure results that follow the
use of BABY'S OWN TABLETS in
treating children's colds, teething
troubles, simple fevers, disordered
stomach, colds, constipation, 25 cents.

Jean and Blaise were riding
abreast, a little in advance of the
retrograde of the difficulties of carrying
on an animated conversation in a
high wind. As they swung round the
head in the road which brought the
hill's great shoulder into view, Jean
threw back his head and stared at the
sky above it with a puzzled frown on
his face.

"Why . . . how queer!" she exclaimed.
"The sun set nearly half an hour
ago and yet there's still quite a
brilliant red glow in the sky. Look,
Blaise—just above where Beirnefelds
stands."

Blaise glanced up casually in the
direction indicated, then suddenly
reined in his horse and half-roared in
the stirrups, staring at the red glow
deepening in the sky ahead.

"That's no sunset!" he exclaimed
sharply. "It's—Great heavens, Jean!
Beirnefelds is on fire!"

Even as he spoke a tongue of flame,
snapping the dull glow with its gleaming
blaze, shot up like a thin red
knife into the sky and sank again.

A shout came from behind. The
others had seen it, also, and recognized
its deadly import. The next moment
the clatter of galloping hoofs
sounded along the road as the whole
party urged their horses on towards
home as fast as they could cover the
ground.

Soon they struck off from the road,
taking a bridle path which slanted
through the woods clothing the base
of the hill, and as they emerged on to
the broad plateau where Beirnefelds
had stood sentinel through wind and
weather for so many years, the whole
extent of the catastrophe was revealed.

By this time the angry glow in the
sky had turned dusk into day, while
from the doors and windows of the
castle fire vomited forth as from a
furnace—upward in long, sinuous
tongues of flame, licking the blackened
walls, downward in spangled
showers of sparks that drifted to-
wards the earth like flights of golden
butterflies.

Little groups of men and women,
helpless as ants to stay the fire, rushed
futilely hither and thither with
hoes and engines, while on the smooth
sward which fronted the castle
lay piled enormous quantities of
household stuff, a medley of fine old
furniture, torn tapestry wreathed
from its place against the walls, pictures,
mirrors—anything and everything
that could be dragged out into the
open by eager hands and willing
arms.

The major-domo, an elderly, grey-
haired man who had been born and
reared upon the estate and who had
taken service with Glyn Peterson on the
day when he had first brought
Jacquette, a bride, to Beirnefelds,
caught sight of the riding-party
turned and came hurrying to Jean's
aid.

The tears were running down his
wrinkled face as he recounted the
discovery of the fire, which must have
started either just before or during
the servants' dinner-hour, when few
people, of course, were about the castle,
and which had obtained a firm
hold before it was detected.
The household staff, practised to a
limited extent, a fire drill had been
held once a month in Peterson's time
—had done their best to cope with the
flames, but vainly. The high wind
which had arisen had thwarted their
utmost efforts, and finally giving up
all hope of saving the interior from
being gutted, they had confined them-

selves to rescuing such valuables as
could be easily removed.

There was the usual mystery as to
how the fire had originated, and several
circulated amongst the chattering
through which hurried hither and
thither, momentarily augmented by the
peasants who, at sight of the castle
in flames, had come trooping up the
hill from the village below.

The most likely story, and the one
to which Blaise inclined to give most
credence, was that the child of a woman
who worked daily at the castle,
escaping from its mother's care and
launched on an independent voyage of
discovery through the rooms, had
knocked over a burning lamp. Then,
terrified at the immediate consequences—
the sudden flaring of some ancient
tapestry, dry as tinder with the summer
heat, near which the lamp had
fallen—he had bolted away, out of the
castle and so home, too scared to
tell anyone of the accident.

But, as Jean commented mournfully,
what did it matter how it happened?
Except for the prosaic view-point of the
fire insurance company, who would
probably desire to know all kinds of
details that it was impossible to supply!

For her, nothing mattered except
that Beirnefelds, her home from child-
hood and the place where she and
Blaise had proposed to spend a great
part of their married life, was a
ruin of flames.

It was a splendid but very terrible
sight. The great grim walls of the
castle stood four-square against the
sky, charred and blackened but defiantly
impervious to the flames that
were licking covetously against the
solid stone which fashioned them. Sentinel
to the very end, they reared themselves
unvanquished, guardians still, though all
that they had sheltered through their
centuries of watch and ward lay
consumed within their very heart.

Jean, standing beside Blaise and
watching the upward-tossing flames
and the crimson banner of the lowering
heavens, spoke suddenly:

"And the sky as red as blood
above it! Blaise, the last of Keturah,
Stanley's prophesies has come true!"

An hour later help was forthcoming
from the distant town to which a mes-
senger had been dispatched post-haste
as soon as it was realized that the
household staff, even with the assistance
from the village, was hopelessly
inadequate to cope with a fire of such
magnitude. But it was already too
late to accomplish very much in the
way of salvage. All that remained
possible was to quench that inferno of
fire as soon as might be and, so per-
haps, save some of the outbuildings.

Hour after hour through the night,
human endeavour fought with the
flames—subduing them again and
again only to find them kindling into
fresh life at the gusty bidding of the
wind, leaping redly from the lambent
heart of the conflagration, which
glowed and pulsed and heaved like
some living monster intent upon
destruction.

It was not until dawn was break-
ing, that, with the dying down of the
wind, the flickering crimson light
an hour later, when the fire had been
faded finally from the sky; and a half
at last extinguished, the village folk,
gathered about the scene of the
catastrophe, had dispersed to their
homes.

Lady Anne, accompanied by Nick

Quick
RELIEF
from pain

A lot of things can cause a headache
or other pain, but there is one thing
that will always give you relief! Just
take a tablet or two of Aspirin. Your
suffering ceases. Relief comes instan-
taneously, regardless of what may have
been making your head throb with pain.

Aspirin is harmless—cannot de-
press the heart. So there's no use
waiting for a headache to "wear off."
It is useless to endure pain of any
kind when you can get Aspirin. It is
a blessing to women who suffer
regular systematic pain to men,
much work on, in spite of eye-strain,
fatigue or neuritis.

Learn the quick relief for colds,
for neuritis, rheumatism, lumbago.
Be sure to get Aspirin—and not a
substitute. All druggists sell Aspirin
tablets. "Aspirin" is a trade-mark
registered in Canada.

The household staff, practised to a
limited extent, a fire drill had been
held once a month in Peterson's time
—had done their best to cope with the
flames, but vainly. The high wind
which had arisen had thwarted their
utmost efforts, and finally giving up
all hope of saving the interior from
being gutted, they had confined them-

billious?
Don't delay!
Relieve congested
liverways of

Take Eno now—
and every morning.

ENO'S
FRUIT SALT

and Claire, started for the inn of the
Green Dragon, whether the landlord
had hurried on ahead to prepare tem-
porary quarters for the now homeless
little company from the castle. But
Jean and Blaise still lingered by the
deserted ruins loth to say farewell to
the place that had meant so much to them.

Beneath the misty aura of the
summer morning sky, fanned by little
vagrant zephyrs—vanguard of the
hurricane which had passed—stood all
that remained of Beirnefelds—blackened,
naked walls, stark against that
tender blue, brooding above the mass
of cooling wreckage.

Jean's mouth quivered a little as
her glance took in the scene of utter
desolation.

"My House of Dreams," she whis-
pered brokenly.

She was silent a few moments, her
eyes embracing all that had once been
Beirnefelds in a gaze which held both
farewell and retrospect. And some-
thing more—some vision of the future.
In the dawn-light peering the
sky above she recognized the eternal
promise of Him Who "commanded the
light to shine out of darkness."

Her House of Dreams! The inner
meaning of the song had grown sud-
denly clear to her.

When she turned again to Blaise,
her expression was serene and tranquil.
Touched with regret perhaps, but
bravely content.

"I don't think it matters, Blaise,"
she said simply. "Beirnefelds was only
a symbol, after all. My House of
Dreams-Come-True isn't built
of stones and mortar. No one's is. It's
just—where love is."

THE END

Little Helps For This Week

"Where hast thou gleaned today?"
—Ruth 2: 19.

What have I learned where'er I've
been.
From all I've heard, from all I've
seen?
What know I more that's worth the
knowing.
What have I done that's worth the
doing?
What have I sought that I should
shun.

What duties have I left undone? —Pythagoras.

All of this world will soon have
passed away. But God will remain,
and thou, whatever thou has become,
good or bad. Thy deeds now are the
seed-corn of eternity. Each single act
in each single day, good or bad, is a
portion of that seed. Each day adds
some line making thee more or less
like Him, more or less capable of His
love.—E. B. Pusey.

There is something very solemn in
the thought that that part of our
work which we have left undone may
first be revealed to us at the end of a
life filled up, as we had fondly hoped,
with useful and necessary employ-
ments.—Passages From Home Life.

Answer Is "We Can"

County in Oregon Helping To Solve
Relief Problem

Through the use of a portable can-
nery in Josephine County, Oregon,
100,000 containers of fruit and vegeta-
bles were filled either for immediate
relief distribution or storage against
future need. Now the cannery is again
putting the rounds, this time to put
up meats of various kinds for the
same purpose. So, to the question as
to whether Josephine County can care
for its unfortunate during the winter,
the answer seems to be, "We can."

Why suffer needlessly! Douglas'
Egyptian Liniment brings quick, sure
relief to cold feet, stiff joints and
wounds. Relieves inflammation. Re-
moves proud flesh.

For more than 100 years members
of the family of Mrs. E. Halliwell, of
Great Yarmouth, England, have been
making photographs.

The ancient Romans regarded silk
as a sort of wool that grew on trees.

The Island Of Bali

Motion Picture Operators Made
Costume Pictures Of Natives

Buleleng, Bali.—The people here in
general are considerably excited over
the place being made for the island of
Bali in the motion picture world.
The arrival of another independent
film group from New York has stirred
up a lot of interest. One thing is sure,
it is going to cost more from now on
to make native costume pictures of
the lovely girls who are making this
island famous all over the world.

At last the women of Bali are be-
coming conscious of the fact that their
beauty is of great value when
reflected upon the silver screen. It
might be of interest to state that the
beauty of the Balinese women and
girls has long been appreciated
throughout Malaysia. They are, in
fact, "glorious, upstanding creatures
with great masses of blue-black hair,
a faint colour of rose diffusing itself
through their skins of brown satin.
They bear themselves with a quiet dig-
nity and lissome grace."

A striking bit of decoration is ad-
ded by the flame-coloured flowers they
wear in their dusky hair. Their eyes,
instead of being oblique, as might be
expected, are set straight in the head.
It is admitted here that the chief
charm in these island belles is found,
not in their faces, but in their figures,
which are slender and willowy.

Polygamy, grown expensive, is de-
creasing here. Also many wives
mean many troubles. Twenty-five
wives formerly constituted a large
harem, although some of the high
rulers possessed several hundred.

Despite stories to the contrary, sub-
sides—the burning of widows—has been
discontinued in Bali. Formerly a
young girl who married an elderly
man incurred this risk of meeting an
unlucky and extremely unpleasant
and New England, some women who
loved her husband is still likely to
join his dead body on the funeral
pyre.

As few ships from Europe or Amer-
ica stop here the islanders are looking
forward to the visit of the Cunard
liner "Carinthia," which will stop here
next March, on her voyage around the
world via the Southern Hemisphere.
The people here are hoping a number
of camera men will disembark.

Because of the failure of ships to
call the people are free from the dis-
eases brought by white men to many
of the South Sea Islanders. The popu-
lation of Bali is generally healthy and
constantly increasing. There are nearly
a million natives in Bali and now
the great majority of them are grow-
ing picture-minded.

EVEREADY
LAYERBILT
THE SECRET
OF LONGER SERVICE

More battery for your money. More hours of service.
That's why EVEREADY LAYERBILT is the biggest factor
in radio "B" power economy on the market today.
Get the smooth, even, lasting flow of power that only
an Eveready LAYERBILT can give. Buy the battery
that is crammed to the top and sides with active, cur-
rent-producing material. Remember that a LAYERBILT
has no round cells and waste space like all other "B"
batteries. Thick, flat layers of current-producing material
press down one on another in a LAYERBILT—every
inch works for you, every ounce counts in service, saving
and satisfaction.

Eveready Layerbilt Radio Batteries are now selling at
lowest prices—buy them from your dealer today.

Curling Club Elect Officers

The annual meeting of the Curling Club was held in the Oliver Cafe on Wednesday the 16th inst. A large number of curlers were present and judging by the enthusiasm shown, exponents of the roarin' game are all set for a big year.

The following officers were elected: Hon. President, R. M. McCool; President, Ed. Meyers; Vice-President, J. P. Winning; Chaplain Rev. H. Young; Sec.-Treas., C. H. McMillan; Executive Committee, J. M. Williams, F. T. Baker, R. T. Amery, W. H. Miller; Ice Committee, Glen Williams; Draw Committee, C. H. McMillan, J. P. Winning, R. T. Amery.

New members who have not been members of any regular curling club will be permitted to join the club on payment of \$5.00 for the season. Fees for regular members were set at \$8.00.

It was decided to charge the Ladies' Curling Club the sum of \$50.00 as their fees for the season, and that they would be granted playing privileges three afternoons a week.

L. Overby was engaged as caretaker.

FOR SALE—Mathews, walnut medium sized piano, in excellent condition, new four years ago at \$500, now \$200 or \$185 in cash. Phone R609.

If you have dry, dead falling, or oily hair, try Hot Oil Treatments. It rejuvenates the scalp, removes dandruff, and gives the hair a healthy appearance. Myrtle Methers will be in Crossfield every Thursday, Friday and Saturday to give oil treatments, finger waves, facials, marcel, etc. Phone R609 for appointments.

Mrs. D. K. Fike

Mrs. Mary R. Fike, beloved wife of D. K. Fike, passed away at her home in Crossfield, on Monday morning, after a lingering illness. She was in her 75th year.

The late Mrs. Fike was born in Illinois, and moved with her parents to Iowa when quite small, at the age of 20 years she was united in marriage to D. K. Fike. They then settled in Kansas, where they resided for 25 years, coming to Alberta in 1903 and settling in the Crossfield district, where she has resided ever since.

Mrs. Fike leaves to mourn her loss her husband D. K. Fike, four sons, Joseph D., Irwin W., and Miles H. of Crossfield, Owen C. of Seattle, Wash.; also two daughters, Mrs. Etta Kilpatrick of Herington, Kansas, and Mrs. Clara Graham of Seattle, Wash., 23 grandchildren and 3 great grandchildren.

Funeral services were held in the United Church on Wednesday afternoon, Rev. C. S. McGrath officiating. The remains were laid to rest in the Crossfield cemetery. The pallbearers were: Wm. Laut, R. M. McCool, F. Hopper, A. W. Gordon, C. Assmusen, S. Collins.

HOCKEY MEETING FRIDAY NIGHT

A meeting of the Hockey Club will be held in the Oliver Cafe on Friday evening Nov. 18 at eight o'clock. All interested please attend.

Raise \$50 for Hockey Club

George Lem, the Tax Rickard of hockey, was responsible for a scheme whereby the Hockey Club benefited to the extent of around \$30.00 inside of 24 hours. George with the assistance of two or three hockey boosters, solicited the business men of the town for merchandise, in fact anything they could get. Donations consisted of everything you could imagine from 600 pounds of coal down to a powder puff.

Tickets were made out and sold at 5 cents a draw. Some of the winners got good prizes indeed, and one bachelor in particular was all smiles as he won a pair of ladies' silk bloomers, and another old buck went home with a powder puff and a can of beef. At any rate, in spite of the hard times, George had around \$30 in the sock for the hockey club within 24 hours.

Brewed in Alberta

BEERS

ARE

Pure and Wholesome

Months of careful brewing of high-grade grains, choice hops and pure mountain water, go to make these sparkling, full-flavored beverages. Aged for months and fully fermented before they reach the public. Drink properly brewed beers only, the purest of all beverages.
